No Duplication Without Permission
sapec.ku.edu**

Alcohol and Sexual Assault

- Common factor in sexual violence: 75-85%
- Alcohol alone will not cause someone to use sexual violence – multiple factors at play
- Drinking alcohol reduces perception of responsibility
- Higher risk when the aggressor holds sexist attitudes, believes rape myths
- Roughly 1/2 of all sexual assaults are committed by men who have been drinking alcohol
- Sexual violence can occur without alcohol use
